

VIO Chemicals shares its customized solutions for the Chinese pharma market at CPhI

Zurich, 19 June 2017 - VIO Chemicals is participating in CPhI China, sharing its customized solutions in development, manufacturing and sourcing of chemical specialties and active pharmaceutical ingredients (APIs) at Shanghai's New International Expo Centre (SNIEC) from 20 through 22 June 2017.

Held yearly, CPhI China brings together domestic and international companies, covering every step of the pharma supply chain. Through its long-established and deep experience of operating in the 'chemical zone' of Shanghai, VIO Chemicals is a dedicated business partner of the Chinese pharma industry and an integral component of CPhI China.

VIO Chemicals will be exhibiting at booth W4D22a, near the entrance of Hall 2, under the label of its Chinese manufacturing arm Yangcheng Haohua Organic Chemicals Co., Ltd. The company will be represented by its CEO & founder, Dimitris Kalias, R&D Centre Director, Haris Koftis, Nanjing Office Director, Yujing Zu and a team of experts.

The Yangcheng Haohua Organic Chemicals Co. booth will be organized around two main themes: first, the company's manufacturing capabilities and, second, its strategic sourcing services. The company will showcase its impressive range of manufacturing assets and production capabilities at lab, kilo, pilot and commercial scales, offering three production units in Binhai totaling 27,000 square meters, one of them cGMP-standard. In addition, it will present its services for strategic sourcing of catalogue, custom-manufactured and proprietary products, meeting quality specifications, deadlines and logistics requirements, and leveraging superior customer service.

Through its long presence in the Chinese market and continuous investment in its operational units, VIO Chemicals has acquired excellent knowledge of the local business models and regulations and established a reliable strategic network in the area. Nowadays, VIO Chemicals acts as the "ears and eyes in China" for a wide range of international pharma clients and offers sophisticated services and high-quality products at competitive prices.

About CPhI China 2017

Since Y2000, CPhI China has established itself as the leading pharma industry business and sourcing event for Eastern Asia, reflecting the huge growth of the Chinese pharma market. Staged by global B2B events organizer and publisher, UBM Live, CPhI China is a three-day event opening June 20 at the Shanghai New International Exhibition Center (SNIEC). CPhI China is co-located with five other pharma industry events, P-Mec for machinery and equipment, ICSE for outsourcing solutions BioPh for biotech solution, InnoPack for Drug Packaging and Delivery Technology and LABWorld for laboratory equipment. Together, the shows bring together more than 2,800 suppliers and are likely to attract some 40,000 visitors from more than 100 countries. More information at <http://www.cphi-china.cn/en>.
